# Citrus Lime Cocktail®

**This is an amazing fruiting plant – every home should have one !!**

CITRUS LIME COCKTAIL is so exciting with its beautifully fragrant white citrus blossom in late spring turning into a continuous supply of baby sized green limes throughout the summer/autumn, and then the fruit turning a pale citrus yellow from late winter.

Cut a lime cocktail fruit into slices and add to your glass of water, soda or gin and tonic and instantly your drink will taste refreshing and flavoursome.

A real bonus - just pick the fruit as you need them- they will happily stay on the plant for much of the year. CITRUS LIME COCKTAIL is so versatile - perfect in limited spaces-espallered against a wall, will be extremely happy in a pot on the patio, or plant as trained topiary standards lining a path to the vegetable garden or on either side of the swimming pool.

The miniature sized limes are beautifully zest in fragrance and taste- super for flavouring your salads with either the juice or the peeled rind and squeeze the juice to flavour your fish CITRUS LIME COCKTAIL will perform outstandingly well if fed 3 x per year with citrus fertiliser- sept, dec, and april. Likes full sun and a sheltered position for best results.
